SUMMARY

Results-oriented software engineer with 5+ years of experience designing and developing scalable web applications and RESTful APIs using Golang, JavaScript, and PHP web technologies. Skilled in optimizing performance, integrating cloud services on AWS, and automating workflows with Jenkins CI/CD pipelines. Passionate about building impactful, efficient solutions that drive business growth and improve user experience.

WORK EXPERIENCE

Qburst Technologies Pvt Ltd

Senior Software Engineer

DEC 2022 - Present

- Designed and integrated RESTful APIs, collaborating with cross-functional teams to align backend logic with front-end requirements, resulting in a 30% reduction in development time.
- Maintained internal technical documentation to support smooth development workflows and onboarding.
- Conducted code reviews, wrote unit tests, and upheld secure coding standards to ensure code quality.
- Managed database schema design and continuously optimized SQL queries for efficient data access using PostgreSQL and MySQL.
- Implemented and maintained CI/CD pipelines in collaboration with the DevOps team using Jenkins, streamlining build, test, and deployment workflows for faster and reliable releases, reducing deployment time by 50%.
- Integrated security best practices by creating Git hooks to align commit messages and run unit tests before committing code.

Zignuts Technolab Pvt Ltd

Full-stack Web Developer

DEC 2020 - NOV 2022

- Developed full-stack web applications using Laravel (PHP), JavaScript, and other modern web technologies, improving site performance and contributing to a 30% increase in overall traffic.
- Converted UI/UX mockups into responsive and interactive web pages using HTML5, CSS3, AJAX, jQuery, and Bootstrap.
- Designed relational database schemas and created technical project plans aligned with business requirements.
- Collaborated with graphic designers to implement visually appealing, cross-browser-compatible web layouts.
- Managed scheduled background processes using Laravel Scheduler (cron jobs) to automate key workflows.
- Integrated third-party payment gateways, ensuring secure and seamless transaction handling in production environments, with a 99.9% uptime rate.

EDUCATION

Marwadi College, Gujarat Technological University

Master of Computer Application - 3.83

JUN 2019 - MAR 2021

R.P. Bhalodiya College, Saurashtra University

Bachelor of Computer Application - 3.08

JUN 2016 - MAR 2019

PROJECTS

Projects and resource management platform microservices

JUN 2025 - Present

This application is designed to help organizations efficiently manage customer data, projects, resource allocations, work tracking, and billing.

- Developed a centralized API Gateway in Go to handle authentication, request validation, and routing across multiple microservices, improving security and service orchestration.
- Developed a feature for generating Excel and PDF reports using customized templates in Go, increasing report generation speed by 40% and reducing manual errors by 50%.
- Optimized complex SQL queries to improve performance and reduce latency in data retrieval operations.
- Executed bug fixes, performed root cause analysis, and provided test evidence to ensure application reliability and support QA processes.

Account platform microservice

JUL 2023 - JUN 2025

The account platform is a microservice within an e-commerce system that offers features related to user account registration, login, and profile management and generates different activity analysis reports.

- Developed RESTful APIs and batch scripts while maintaining up-to-date specification documents to ensure clarity and consistency across the development process.
- Maintained code for multiple regions and used Amazon Route 53 for routing, ensuring high availability and low latency for users across multiple geographical locations.
- Used Amazon SNS to send notifications to different downstream teams for specific actions, ensuring timely communication and collaboration.
- Improved system observability by using Datadog to monitor performance and troubleshoot issues across distributed services, following industry best practices.
- Collaborated with the DevOps team to containerize the application, streamlining deployment processes and enhancing overall efficiency.
- Monitored Amazon CloudWatch metrics during release events for EC2 instances and RDS, ensuring system performance and reliability during deployments.
- Secured sensitive data with GPG encryption and uploaded files to Amazon S3, ensuring full compliance with security policies and meeting 100% of security audit requirements.
- Contributed to sprint planning, estimation, daily stand-ups, and retrospectives to ensure timely, team-driven delivery.

Rewards and recognition SPA

DEC 2022 - JUN 2023

This application aims to recognize talent and motivate top performers to become flag bearers, which will be decided based on a survey.

- Created and implemented database and code structures to deliver desired outcomes.
- Implemented social authentication for Google sign-in, increasing user sign-up rates by 50%.
- Coordinated with the front-end team for API design and development.
- Handled deployments to the testing server to support QA validation and ensure smooth pre-production testing.
- Integrated microservices to automate certificate generation and email notifications.

Property renter web application

APR 2021 - NOV 2023

The project aims to develop a native iOS and Android mobile application that allows property owners to list their property for rent and renters to contact the owner and find flatmates.

- Designed RESTful APIs for seamless data transfer between platforms.
- Implemented one-to-one and group chat features using Firebase Cloud Messaging (FCM) to deliver timely message notifications and simulate near real-time communication.
- Optimized images and videos before uploading to AWS S3, ensuring efficient storage and faster content delivery.
- Utilized Postman to create comprehensive API endpoint documentation for 50+ APIs, reducing onboarding time for new team members by 50%.

SKILLS

- **Languages & Frameworks:** Go (Golang), PHP, SQL, JavaScript, Laravel, jQuery, ReactJS
- **DevOps & Tools:** Docker, Jenkins (CI/CD), Git, Swagger, Postman, Jira, GitHub Copilot, ChatGPT
- **Databases:** PostgreSQL, MySQL
- **Cloud & Log Services:** AWS (S3, EC2, ECS, ELB, SNS), Datadog
- **Soft Skills:** Time management, Team collaboration, Quick learner, Problem-solving
