SUMMARY

Experienced full-stack web developer with over 4 years of proficiency in Golang and PHP Laravel. Skilled in the end-to-end development process, including design, construction, and optimization of web applications and REST APIs. Passionate about leveraging expertise to make meaningful contributions to impactful web development projects.

EXPERIENCE

Senior Software Engineer

Qburst Technologies Pvt Ltd

📅 2022 - Present

- Develop and maintain scalable, high-performance back-end systems using Golang and PHP.
- Collaborate with other teams, design APIs, and optimise performance.
- Developed and maintained internal documentation to ensure smooth operations.
- Conducted code reviews and wrote unit test cases to ensure the quality and security of the code.
- Managed database schema design and optimised queries for efficient data retrieval and storage in the database.
- Implemented CI/CD workflows using Jenkins to enhance deployment speed and reliability.

Full-stack Web Developer

Zignuts Technolab Pvt Ltd

📅 2020 - 2022

- Contributed to full-stack development using Laravel for backend and Vue.js for frontend.
- Transformed mock-ups into responsive, user-friendly web pages using HTML, CSS, AJAX, jQuery, and related technologies.
- Designed database schemas and created project plans to align with expected outcomes.
- Collaborated with graphic designers to build responsive web layouts using Bootstrap and CSS3.
- Implemented and managed scheduled tasks using Laravel cron jobs.
- Integrated third-party payment systems to enable secure and seamless transactions.

EDUCATION

Master of Computer Application (MCA)

Marwadi College (GTU)

📅 2019 - 2021

Bachelor of Computer Application (BCA)

R. P. Bhalodiya College (SU)

📅 2016 - 2019

PROJECTS

Account Platform: Microservice

The account platform is a microservice within an e-commerce system that offers features related to user account registration, login, profile management, and generates different activity analysis reports.

Technology Used: Go, PHP, Docker, Swagger, PostgreSQL, MySQL, Kafka, AWS ECS, AWS EC2, AWS S3

- Developed RESTful APIs and batch scripts while maintaining the specification document.
- Converted code by analyzing and implementing logic from PHP to Golang.
- Enhanced observability and monitoring by applying best practices with Datadog for performance tracking and troubleshooting distributed systems.
- Executed bug fixes, performed root cause analysis, and provided test evidence to ensure application reliability and support QA processes.
- Designed and maintained relational database schema to support scalable and efficient data storage solutions.
- Optimised complex SQL queries to improve performance and reduce latency in data retrieval operations.
- Collaborated with the DevOps team to containerize the application and improve deployment processes.
- Integrated security best practices by creating git hooks to align commit messages and run unit tests before committing code.
- Developed the data migration process from the old to the new database using Kafka.
- Developed database interaction layers using Go Squirrel, enabling modular and maintainable query construction compatible with various SQL databases, including PostgreSQL.

PROJECTS

Rewards and Recognition

This application aims to recognise talent and motivate top performers to become flag bearers, which will decided based on survey.

Technology Used: Go, PHP, Docker, Swagger, PorstgreSQL, ReactJS, Google OAuth

- Created and implemented the database and code structures to deliver desired outcomes.
- Implemented social authentication for Google sign-in.
- Coordinated with the front-end team for API design and development.
- Managed deployment on the testing server.
- Integrated microservices to generate certificates and send mail notifications.

Property renter app - API

The project aims to develop a native iOS and Android mobile application that allows property owners to list their property for rent and renters to contact the owner and find flatmates.

Technology used: PHP-Laravel, AWS S3, MySQL, VueJS

- Designed a RESTful APIs for seamless data transfer between platforms.
- Developed one-to-one and group chat functionalities using FCM.
- Optimized images and videos before uploading to AWS S3.
- Used Postman for creating comprehensive API endpoint documentation.

Mobile game app API - Admin panel

This game app lets users explore different decks and guess their words. They can conveniently purchase premium decks using Google Pay or Apple Pay, while admins can efficiently manage resources via the admin panel.

Technology Used: PHP-Laravel, AWS S3, VueJs, MySQL

- Created an admin panel to manage game data with various CRUD operations.
- Integrated Laravel with the AdminLTE theme to enhance UI development and ensure a seamless, user-friendly experience.
- Implemented an image compression algorithm before uploading media to AWS S3.

SKILLS

Technical Skills

PHP	Laravel	Golang	MySQL	PostgreSQL	Git	Jira	Postman	JavaScript	jQuery
VueJS	ReactJS	CSS3	Bootstrap	Swagger	Docker	Amazon Web Services		Jenkins	

Soft Skills

Task and Time management	Team Player	Quick Learner	Problem Solving
