SUMMARY

Experienced full-stack web developer with 4+ years of hands-on experience in Go, PHP (Laravel), and JavaScript. Proficient in the full development lifecycle—from design and development to deployment and optimization of scalable web applications and RESTful APIs. Passionate about building impactful solutions and contributing to high-performing engineering teams.

WORK EXPERIENCE

Senior Software Engineer | Qburst Technologies Pvt Ltd | [Link](#) **December 2022 - Present**

- Develop and maintain scalable backend systems, focusing on performance, reliability, and clean architecture.
- Design and integrate RESTful APIs, collaborating with cross-functional teams to align backend logic with front-end requirements.
- Maintain internal technical documentation to support smooth development workflows and onboarding.
- Conduct code reviews, write unit tests, and uphold secure coding standards to ensure code quality.
- Manage database schema design and continuously optimize SQL queries for efficient data access using PostgreSQL and MySQL.
- Implement and maintain CI/CD pipelines in collaboration with the DevOps team using Jenkins, streamlining build, test, and deployment workflows for faster and more reliable releases.

Full-stack Web Developer | Zignuts Technolab Pvt Ltd | [Link](#) **December 2020 - November 2022**

- Developed full-stack web applications using Laravel (PHP) for the backend and JavaScript for frontend components.
- Converted UI/UX mockups into responsive and interactive web pages using HTML5, CSS3, AJAX, jQuery, and Bootstrap.
- Designed relational database schemas and created technical project plans aligned with business requirements.
- Collaborated with graphic designers to implement visually appealing, cross-browser-compatible web layouts.
- Managed scheduled background processes using Laravel Scheduler (cron jobs) to automate key workflows.
- Integrated third-party payment gateways, ensuring secure and seamless transaction handling in production environments.

SKILLS

- Languages & Frameworks:** Go (Golang), PHP, SQL, JavaScript, Laravel, jQuery, React.js
- DevOps & Tools:** Docker, Jenkins (CI/CD), Git, Swagger, Postman, Jira, GitHub Copilot, ChatGPT
- Databases:** PostgreSQL, MySQL
- Cloud & Logging Services:** AWS (S3, EC2, ECS, ELB, SNS), Datadog
- Soft Skills:** Time management, Team collaboration, Fast learner, Problem-solving

PROJECTS

Account Platform: Backend Microservice **July 2023 - Present**

The account platform is a microservice within an e-commerce system that offers features related to user account registration, login, and profile management and generates different activity analysis reports.

- Developed RESTful APIs and batch scripts while maintaining up-to-date specification documents to ensure clarity and consistency across the development process.
- Maintained code for multiple regions and used Amazon Route 53 for routing, ensuring high availability and low latency for users across multiple geographical locations.
- Used Amazon SNS to send notifications to different downstream teams for specific actions, ensuring timely communication and collaboration.

- Improved system observability by using Datadog to monitor performance and troubleshoot issues across distributed services, following industry best practices.
- Executed bug fixes, performed root cause analysis, and provided test evidence to ensure application reliability and support QA processes.
- Optimised complex SQL queries to improve performance and reduce latency in data retrieval operations.
- Collaborated with the DevOps team to containerize the application and improve deployment processes.
- Integrated security best practices by creating Git hooks to align commit messages and run unit tests before committing code.
- Monitored Amazon CloudWatch metrics during release events for EC2 instances and Aurora DB, ensuring system performance and reliability during deployments.
- Used GPG encryption to secure sensitive data and uploaded files to Amazon S3, ensuring data confidentiality and compliance with security policies.

Rewards and Recognition - Web Application

December 2022 - June 2023

This application aims to recognise talent and motivate top performers to become flag bearers, which will be decided based on a survey.

- Created and implemented the database and code structures to deliver desired outcomes.
- Implemented social authentication for Google sign-in.
- Coordinated with the front-end team for API design and development.
- Handled deployments to the testing server to support QA validation and ensure smooth pre-production testing.
- Integrated microservices to automate certificate generation and email notifications.

Property Renter App - API

December 2021 - November 2023

The project aims to develop a native iOS and Android mobile application that allows property owners to list their property for rent and renters to contact the owner and find flatmates.

- Designed RESTful APIs for seamless data transfer between platforms.
- Implemented one-to-one and group chat features using Firebase Cloud Messaging (FCM) to deliver timely message notifications and simulate near real-time communication.
- Optimized images and videos before uploading to AWS S3, ensuring efficient storage and faster content delivery.
- Used Postman for creating comprehensive API endpoint documentation.

Mobile Game App - API & Admin Panel

April 2021 - November 2023

The project aims to develop a native iOS and Android mobile application that allows property owners to list their property for rent and renters to contact the owner and find flatmates.

- Created an admin panel to manage game data with various CRUD operations.
- Integrated Laravel with the AdminLTE theme to enhance UI development and ensure a seamless, user-friendly experience.
- Implemented an image compression algorithm before uploading media to AWS S3.

EDUCATION

Marwadi College, Gujarat Technological University
Master of Computer Application

Gujarat, India
2019-2021

R.P. Bhalodiya College, Saurashtra University
Bachelor of Computer Application

Gujarat, India
2016-2019
