SUMMARY

Results-driven Senior Software Engineer with 5+ years of experience building high-performance, cloud-native microservices in Go and PHP. Proven track record designing RESTful and event-driven APIs, containerizing services with Docker, and deploying on AWS (EC2, ECS, S3, SNS, Route 53, CloudWatch). Experienced with Jenkins CI/CD pipelines, PostgreSQL/MySQL optimization, and distributed system observability using Datadog. Hands-on with Kubernetes orchestration in production and Apache Kafka CDC pipelines via Debezium, delivering robust, production-grade systems at scale.

WORK EXPERIENCE

Qburst Technologies Pvt Ltd

Senior Software Engineer

DEC 2022 - Present

- Designed and implemented scalable microservices architecture and high-performance RESTful APIs, serving high-concurrency workloads optimized for low latency and horizontal scalability under peak traffic.
- Designed and operated Jenkins CI/CD pipelines in collaboration with the DevOps team, automating build, test, and deployment workflows and cutting deployment time by 50%.
- Worked with Kubernetes-based microservice deployments using Pods, Deployments, and Services in production.
- Containerized services using Docker and coordinated with the DevOps team on container orchestration strategies to streamline environment parity and deployment consistency.
- Managed database schema design and continuously optimized complex SQL queries for efficient data access using PostgreSQL and MySQL.
- Implemented Git hooks enforcing commit message conventions and pre-commit unit test execution to uphold secure coding standards and code quality.
- Maintained internal technical documentation and conducted code reviews to support smooth onboarding and development workflows.
- Led end-to-end ownership of services: design, development, deployment, and monitoring.

Zignuts Technolab Pvt Ltd

Full-stack Web Developer

DEC 2020 - NOV 2022

- Developed and optimized full-stack web applications with a focus on page structure, load performance, and metadata—driving a 30% increase in organic site traffic.
- Designed relational database schemas and created technical project plans aligned with business requirements.
- Integrated third-party payment gateways ensuring secure, seamless transaction handling with a 99.9% uptime rate in production.
- Designed and managed automated email and notification job pipelines using cron jobs, ensuring timely, reliable delivery of critical communications without manual intervention.
- Converted UI/UX mockups into responsive, cross-browser-compatible web pages.
- Collaborated with graphic designers to implement visually appealing, cross-browser-compatible web layouts.

PROJECTS

Projects & Resource Management Platform (Microservices)

JUN 2025 - Present

This application is designed to help organizations efficiently manage customer data, projects, resource allocations, work tracking, and billing.

- Developed a centralized API Gateway in Go (Golang) handling authentication, request validation, and intelligent routing across multiple microservices, improving security and service orchestration.
- Built Excel and PDF report generation features using customized Go templates, increasing report generation speed by 40% and reducing manual errors by 50%.
- Optimized complex SQL queries to reduce data retrieval latency and improve overall system throughput.
- Executed root cause analysis on production issues and provided test evidence to ensure reliability and support QA processes.

Account Platform Microservice (E-Commerce)

JUL 2023 - JUN 2025

The account platform is a microservice within an e-commerce system that offers features related to user account registration, login, and profile management and generates different activity analysis reports.

- Developed RESTful APIs and batch scripts in Go (Golang) for a multi-region e-commerce platform; used Amazon Route 53 for geographic routing to ensure high availability and low latency.
- Leveraged Amazon SNS for event-driven notifications to downstream services, ensuring timely cross-team communication.
- Monitored distributed service health and resolved incidents using Datadog observability platform following industry best practices.
- Secured sensitive data with GPG encryption and managed file storage on Amazon S3, achieving 100% compliance with security audit requirements.
- Contributed to building a real-time data migration pipeline from MySQL to PostgreSQL using Apache Kafka and Debezium (CDC).
- Monitored Amazon CloudWatch metrics for EC2 and RDS instances during release events, ensuring system performance and reliability.
- Contributed to sprint planning, estimation, daily stand-ups, and retrospectives within an Agile/Scrum delivery model.

Rewards & Recognition SPA

DEC 2022 - JUN 2023

This application aims to recognize talent and motivate top performers to become flag bearers, which will be decided based on a survey.

- Designed and implemented database and code structures in Go (Golang) and integrated Google OAuth social authentication, increasing user sign-up rates by 50%.
- Integrated microservices to automate certificate generation and email notifications, coordinating API design with the front-end team.
- Handled deployments to the testing server to support QA validation and ensure smooth pre-production testing.

Property Renter Web Application

APR 2021 - NOV 2023

The project aims to develop a native iOS and Android mobile application that allows property owners to list their property for rent and renters to contact the owner and find flatmates.

- Designed RESTful APIs in PHP and Go (Golang) for seamless data transfer across iOS and Android platforms.
- Implemented real-time one-to-one and group chat features using Firebase Cloud Messaging (FCM) for near-real-time message delivery.
- Optimized images and videos before uploading to AWS S3, ensuring efficient storage and faster content delivery.
- Utilized Postman to create comprehensive API endpoint documentation for 50+ APIs, reducing onboarding time for new team members by 50%.

SKILLS

- **Languages & Frameworks:** Go (Golang), PHP, SQL, JavaScript, ReactJS, jQuery, gRPC/Protobuf, microservices, and Event-Driven Architecture
- **DevOps & Tools:** Docker, CI/CD (GitHub Actions / Jenkins), Git, Swagger, Postman, Jira, GitHub Copilot, Kubernetes.
- **Messaging Systems:** Apache Kafka, AWS SNS (event-driven systems)
- **Databases:** PostgreSQL, MySQL — schema design, query optimization.
- **Cloud & Log Services:** AWS (S3, EC2, ECS, ELB, SNS), Datadog (monitoring, distributed tracing, alerting).
- **Soft Skills:** Team collaboration, Problem solving, Quick learner, Time management.

EDUCATION

Master of Computer Application (MCA)

Marwadi College, Gujarat Technological University - GPA : 3.83

JUN 2019 - MAR 2021

Bachelor of Computer Application (BCA)

R.P. Bhalodiya College, Saurashtra University - GPA : 3.08

JUN 2016 - MAR 2019

CERTIFICATES

Ultimate AWS Certified Cloud Practitioner CLF-C02 2025 [!\[\]\(f507db636256ac11a5525ef93ec6b8d7_img.jpg\)](#)

Jenkins: Jobs, Pipelines, CI/CD and DevOps for Beginners (Udemy) [!\[\]\(a8ff699ced33317c53c86f9bf3171905_img.jpg\)](#)
