Summary

Experienced software engineer with over 4 years of hands-on experience in web application development. Proficient in the full development lifecycle from design and development to deployment and optimization of scalable web applications and RESTful APIs. Passionate about building impactful solutions and contributing to high-performing engineering teams.

WORK EXPERIENCE

Qburst Technologies Pvt Ltd

Senior Software Engineer

Dec 2022 - Present

- Design and integrate RESTful APIs, collaborating with cross-functional teams to align backend logic with front-end requirements.
- Maintain internal technical documentation to support smooth development workflows and onboarding.
- Conduct code reviews, write unit tests, and uphold secure coding standards to ensure code quality.
- Manage database schema design and continuously optimize SQL queries for efficient data access using PostgreSQL and MySQL.
- Implement and maintain CI/CD pipelines in collaboration with the DevOps team using Jenkins, streamlining build, test, and deployment workflows for faster and more reliable releases.
- Integrated security best practices by creating Git hooks to align commit messages and run unit tests before committing code.

Zignuts Technolab Pvt Ltd

Full-stack Web Developer

Dec 2020 - Nov 2022

- Developed full-stack web applications using Laravel (PHP) for the backend and JavaScript for frontend components.
- Converted UI/UX mockups into responsive and interactive web pages using HTML5, CSS3, AJAX, jQuery, and Bootstrap.
- Designed relational database schemas and created technical project plans aligned with business requirements.
- Collaborated with graphic designers to implement visually appealing, cross-browser-compatible web layouts.
- Managed scheduled background processes using Laravel Scheduler (cron jobs) to automate key workflows.
- Integrated third-party payment gateways, ensuring secure and seamless transaction handling in production environments.

EDUCATION

Marwadi College, Gujarat Technological University

Master of Computer Application - 3.83

JUN 2019 - MAR 2021

R.P. Bhalodiya College, Saurashtra University

Bachelor of Computer Application - 3.08

JUN 2016 - MAR 2019

PROJECTS

Project and Resource Management Platform Microservices Architecture

JUN 2025 - Present

- Implemented a centralized API Gateway in Go to handle authentication, request validation, and routing across multiple microservices, improving security and service orchestration.
- Implemented a feature for generating Excel and PDF reports using customized templates in Go.
- Actively contributed to agile development practices, including sprint planning, story point estimation, daily stand-ups, and sprint retrospectives, ensuring timely and collaborative delivery.

Account Platform Backend Microservice

JUL 2023 - JUN 2025

- Developed RESTful APIs and batch scripts while maintaining up-to-date specification documents to ensure clarity and consistency across the development process.
- Maintained code for multiple regions and used Amazon Route 53 for routing, ensuring high availability and low latency for users across multiple geographical locations.
- Used Amazon SNS to send notifications to different downstream teams for specific actions, ensuring timely communication and collaboration.
- Improved system observability by using Datadog to monitor performance and troubleshoot issues across distributed services, following industry best practices.
- Executed bug fixes, performed root cause analysis, and provided test evidence to ensure application reliability and support QA processes.
- Optimised complex SQL queries to improve performance and reduce latency in data retrieval operations.
- Collaborated with the DevOps team to containerize the application and improve deployment processes.
- Monitored Amazon CloudWatch metrics during release events for EC2 instances and RDS, ensuring system performance and reliability during deployments.
- Used GPG encryption to secure sensitive data and uploaded files to Amazon S3, ensuring data confidentiality and compliance with security policies.

Rewards and Recognition Web Application

DEC 2022 - JUN 2023

- Created and implemented the database and code structures to deliver desired outcomes.
- Implemented social authentication for Google sign-in.
- Coordinated with the front-end team for API design and development.
- Handled deployments to the testing server to support QA validation and ensure smooth pre-production testing.
- Integrated microservices to automate certificate generation and email notifications.

Property Renter App APIs

APR 2021 - NOV 2023

- Designed RESTful APIs for seamless data transfer between platforms.
- Implemented one-to-one and group chat features using Firebase Cloud Messaging (FCM) to deliver timely message notifications and simulate near real-time communication.
- Optimized images and videos before uploading to AWS S3, ensuring efficient storage and faster content delivery.
- Used Postman for creating comprehensive API endpoint documentation.

SKILLS

- **Languages & Frameworks:** Go (Golang), PHP, SQL, JavaScript, Laravel, jQuery, React.js
- **DevOps & Tools:** Docker, Jenkins (CI/CD), Git, Swagger, Postman, Jira, GitHub Copilot, ChatGPT
- **Databases:** PostgreSQL, MySQL
- **Cloud & Log Services:** AWS (S3, EC2, ECS, ELB, SNS), Datadog
- **Soft Skills:** Time management, Team collaboration, Quick learner, Problem-solving
